

Where are North Carolina's school-based health centers?

Comprehensive School-Based Health Centers

Alamance | *Piedmont Health Services* | Sylvan Elementary School

Ashe | *Appalachian District Health Department* | Top Dog Clinic-Ashe County Middle

Buncombe | *Blue Ridge Health Services* | Asheville Middle, Clyde A. Erwin Middle, Enka Middle, IC Imagine Charter | *Western North Carolina Community Health Services* | Claxton Elementary School, Isaac Dickson Elementary School

Caswell | *Compassion Healthcare (Mobile)* | North Elementary, South Elementary, Oakwood Elementary, Stoney Creel elementary, Dillard Middle School, Barley Yancy High school

Cherokee | *Cherokee County Health Department* | Andrews High School

Cleveland | *Cleveland County Health Department* | Burns High School, Burns Middle School, Crest High School, Crest Middle School, Kings Mountain High School, Kings Mountain Middle School, Shelby High School, Shelby Middle School, North Shelby Middle

Forsyth | *The School Health Alliance for Forsyth County* | Mineral Springs, Ashley Elementary, Winston-Salem Prep Academy, North Forsyth, Moore Elementary, Petree Elementary | *The School Health Alliance for Forsyth County Mobile Unit* | Glenn HS, MMU at Hanes Middle School, MMU at Konnoak MS, MMU at Easton Elementary, MMU at Parkland HS, and MMU at Carver HS

Gaston | *Kintegra* | Tyron Elementary, Bessemer City Central, Bessemer City Primary, Bessemer City Middle, North Belmont Elementary, Rankin Elementary, Stanley Middle, Bessemer City High, Stanley Middle, Bessemer City High, Mt. Holly Middle, Catawba Heights Elementary, Pinewood Elementary, WB Beam Intermediate, Cherryville Elementary, Chavis Elementary, Cherryville High, Sadler Elementary, Kiser Elementary, Chapel grove Elementary, East Gaston High, Springfield Elementary

Henderson | *Blue Ridge Health* | Bruce Drysdale Elementary School, Edneyville Elementary, Sugarloaf Elementary, Apple Valley Middle School, North Henderson High School, Hillandale Elementary School

Hertford | *Roanoke-Chowan Community Health Center* | Hertford County Middle School

Jackson | *Blue Ridge Health* | Fairview Elementary, Smoky Mountain High School

McDowell | *Western North Carolina Community Health Services* | West Marion Elementary School, Marion Elementary School, Pleasant Gardens Elementary School, West McDowell Middle School, East McDowell Middle School, McDowell High School

Montgomery | *FirstHealth of the Carolinas* | East Middle, West Middle, Montgomery Central High

New Hanover | *Coastal Horizons/Wilmington Health Access for Teens (WHAT)* | Ashley High School, Hoggard HS, Laney High School, New Hanover High School

Northampton | *Rural Health Group* | KIPP Gaston College Preparatory

Pender | *The Center for Rural Health and Innovation/PATH* | Cape Fear Middle School, Pender High School |

Polk | *Blue Ridge Health* | Polk County Middle School

Rockingham | *Rockingham County Student Health/UNC Health* | McMichael High School, Morehead High School, Reidsville High School, Rockingham County High School

Swain | *Blue Ridge Health Services* | Swain County Middle School

Transylvania | *Blue Ridge Health Services* | Rosman Middle School

Wayne | *Wayne Initiative for School Health (WISH)* | Eastern Wayne High School, Wayne Middle High Academy, Goldsboro High School, Dillard Middle School, Brogden Middle School, Southern Wayne High School, Mount Olive Middle School

Wilkes | *Wilkes County Health Department-MESH(Mobile)* | East Wilkes Middle School, North Wilkes, Middle School, West Wilkes Middle School, Central Wilkes Middle School, East Wilkes High School, North Wilkes High School, West Wilkes High School, Wilkes Central High School, Wilkes Early College

Wilson | *Wilson Area School Health* | Forest Hills Middle School, Hunt High School, Fike High School, Beddingfield High School

Yancey | *Mountain Community Health Partnership* | Cane River Middle School, East Yancey Middle School

School-Based Health Centers in North Carolina

46%¹ of North Carolina's counties have school-based health services (including SBHCs, telehealth sites, and mobile clinics) serving elementary, middle, and high school-aged children.

24%¹ of counties in North Carolina are home to at least one school-based health center, where services are provided to students on campus by a health provider.

School-based programs vary in structure but can be centers operated on school grounds or mobile clinics that visit school-sites.

These centers can provide services including:

- Immunizations
- Vision, hearing and scoliosis screenings
- Behavioral risk assessments
- Sports physicals
- Treatment of acute and chronic illness
- Nutrition counseling
- Lab tests
- Prescribing, dispensing and administering of medications
- Group counseling
- Health education
- Basic nursing services

The ABC's of SBHC's

1. School- Based Health Centers (SBHCs) are partnerships between schools and community health organizations to provide physical and mental health services at or near schools.
2. SBHCs can be sponsored by federally qualified health centers, hospitals, health departments, physician groups as well as stand-alone 501-C3 organizations.
3. They differ from school nurses by providing an array of primary, preventive, nutritional and mental health services.
4. The North Carolina Division of Public Health, Children & Youth Branch, funds a portion of North Carolina's SBHCs through a competitive grant. They also credential SBHCs based on requirements related to accessibility and services provided.
5. SBHCs work with families, educators, healthcare providers, school nurses, businesses and community partners because they believe collaboration is the way to achieve the ultimate goal of healthy young people.

¹. Based on 2024 NCSBHA Survey results

SBHCs improve both health and academic success . . .

STUDENTS AT SCHOOLS WITH SBHCs HAVE GREATER ACCESS TO PRIMARY AND PREVENTIVE CARE AND LESS NEED FOR URGENT CARE.

Children have greater access to important healthcare services.

- SBHC's are associated with an increased usage of preventive services and 74% decrease in students excluded from school because of a lack of a state-mandated physical examination¹.
- Students who used SBHC's were more likely to complete immunization series that required multiple doses and more likely to be up to date on Tdap (71% vs 62%; P < .001), varicella (20% vs 13%; P < .001), and measles/mumps/rubella (89% vs 83%; P < .001)².

They're less likely to be hospitalized or go to the emergency room.

- In fact, students at schools with SBHCs are 20% less likely to report hospitalization³.
- Students that used SBHC's are also 50% less likely to visit an emergency room⁴.
- Students with asthma and access to SBHCs are hospitalized 71% less frequently than students with asthma without access to SBHCs².

SBHCs help save Medicaid dollars.

- Medicaid enrollees at schools with SBHCs have much lower inpatient and emergency department costs³.

Students at schools with SBHCs are more likely than other children to receive important preventive services.

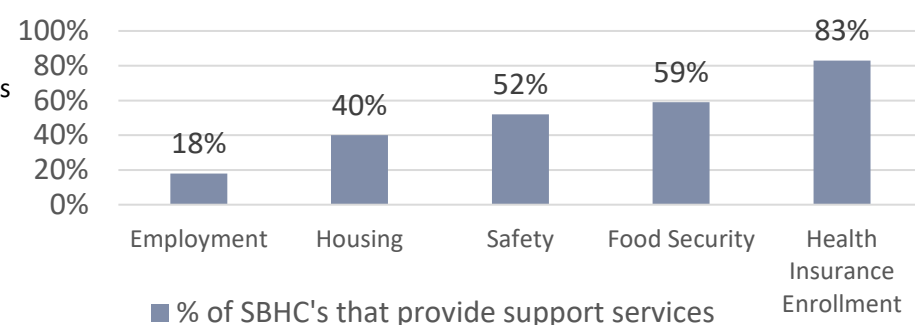

EDUCATIONAL OUTCOMES AND SOCIAL DETERMINANTS OF HEALTH.

- Districts with SBHC's are associated with lower drop-out rates and an average grade promotion increase of 11.5% for students in schools with an SBHC's⁵.
- Students with access to SBHC's also score an average of 30 points more on the SAT and are 5% more likely to pass the Grade 3 math test⁶.

SBHC's often serve as a safety net for underserved communities.

- In addition to healthcare, SBHC's reported providing services for health insurance enrollment, food security, interpersonal relationship and safety services, housing, and employment services. These services help address social determinants of health for students and families⁷.

SBHC's providing support Services⁷

Social Determinants of Health⁷

SCHOOL-BASED TELEHEALTH IS AN EFFECTIVE WAY TO INCREASE ACCESS TO CARE.

- Telehealth allows a child to be treated by a provider while at school without the provider having to remain on-site full-time. It increases access to important services in areas where provider capacity is limited.
- It can be used for mental health services, nutrition services, sub-specialty care, collaborative care, dentistry, etc.
- Nationally, there was a large expansion of telehealth services among SBHC's. According to a national poll, 90% of SBHC's provide some services via telehealth in 2022, compared to only 19% in 2017⁸.

Cost Effectiveness and Sustainability . . .

SBHC's ARE COST-EFFECTIVE FORMS OF HEALTHCARE

SBHCs are cost-beneficial to families, districts, and communities.

- SBHC's can provide an estimated cost-savings of \$35 to \$970 per visit¹.
- Districts that have implemented SBHC's have seen up to a net \$1.35 million social benefit over 3 years¹.
- Students with access to SBHC's benefit from more dental services, less prescription drug use, more mental health services, and fewer hospitalizations¹.

Funding SBHC's

- Reimbursement from billing and insurance were the most popular funding path for SBHC's nationally according to a School-Based Health Alliance survey in 2022. Federal and state funding were the next popular funding source for these programs⁸.
- While SBHC's often rely on various funding sources, sustainability relies on funding from state and local government, especially for non-FQHC's². State funding in NC has not increased since 2014^{3,4}.
- State and local funding helps offset the losses from non-reimbursable services and serving uninsured patients².

Many important services SBHCs provide aren't reimbursed.

- Basic nursing services
- Health education services
- Some non-required immunizations
- Some immunization administration costs
- Case management services like:
 - Obtaining prior authorization from a student's primary medical home
 - Obtaining prior authorization to avoid reaching the visit limit for dietician and mental health services
 - Connecting students to specialist services

OTHER STATES CAN PROVIDE LESSONS FOR SUSTAINABILITY.

New Mexico leverages partnerships for sustainability.

- To increase the availability of federal funding for SBHC's, The New Mexico Department of Health partners with the National Alliance for SBHC's and other state networks⁵.
- In addition to approving \$3 million to expand SBHC's, state congress passed legislation which added the creation and operation of SBHC's into the Public Health Act, codifying the state's intention to provide funding for and support to expanding and sustaining SBHC's⁶.

Maryland has established a state council to advance SBHC's.

- Maryland established The Council of Advancement of School-Based Health Centers to advance the integration of SBHC's into the health care and education systems at the State and local levels⁷.
- In 2022, the Council successfully recommended Medicaid reimbursement for sports physicals provided by SBHC clinicians. The policy was implemented in 2023⁷.

Georgia has invested \$125 million to support the planning and start-up of new SBHC's.

- In 2022, the Governor of Georgia allocated \$125 million from COVID-19 Federal Relief Funds to enhance Georgia's School-Based Health Center Program. The investment is a part of the Governor's plan to lower costs and increase access to quality healthcare coverage for everyone -- especially those in rural Georgia^{9,10}.
- Currently, only rural schools and academically underperforming districts qualify for this support to build new centers. Eligible awardees can receive up to \$1 million from the Georgia Department of Education^{9,10}.

WHAT SBHCs NEED FOR GROWTH IN NC

- Increased state funding and support for:
 - Capital and operational funds to sustain and expand services in NC's underserved communities.
 - Global payment methodology to cover non-reimbursable services such as health education, basic nursing services and case management for receiving prior authorization for services.
